

## Instructions

1. List all ingredients in order of predominance in your finished product AS SOLD. For ingredients that contain several component ingredients, components should be listed separately, but may be grouped together only if you cannot determine the exact quantities of component ingredients because your source ingredient is already prepared. As example: Chicken Fat with mixed tocopherols. These ingredients should be listed separately.
2. Your pledge applies to 100% of stated ingredient. Example: Chicken by-product meal - Yes under USDA Inspected and Approved pledges that 100% of all components in the by-product meal are USDA Inspected and Approved. Any variant of a single ingredient's quality, inspection status or origin must be listed separately, and should follow the order of predominance.
3. List each vitamin and mineral (included in premixes) separately.
4. Though your ingredient list may provide the AAFCO-defined term, please provide the common name for the product under Common Name or Common Description. Example: Ingredient Chicken - Common Name: provide detail to whether the meat includes whole poultry carcass only, whole poultry carcass mixed with partial poultry carcass, or poultry carcass comprised of substantially cartilage and bone.
5. Provide the response "Yes" under appropriate column for each ingredient as to USDA Inspected and Passed, USDA Graded (provide Grade), Not USDA Inspected, Equivalent Safety Inspection (state the equivalent safety inspection and authority), Origin US, Origin North America, Origin China, and/or Origin all other Countries.
6. Provide company name, address and website. Sign and date. Signature should be an officer of the company; preference to be President, CEO, or Officer closest to production responsibility (COO is acceptable).
7. Forward completed forms to Susan@TruthaboutPetFood.com.
